

18 - Machined Components

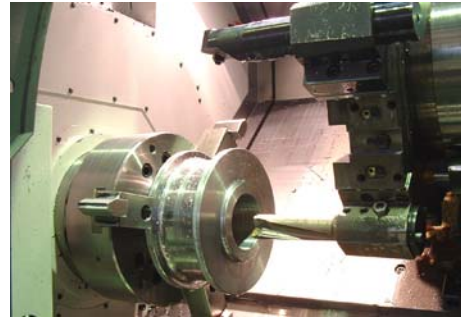

Glasslite's skilled team and inhouse high-tech CNC machining capacity provides the following services:

Turning – Milling – Sawing
Profile Cutting – Welding.

Glasslite has diversified to supply standard and custom special components to a wide range of industries.

Target examples:

Agriculture - Air Conditioning - Automotive -
Construction - Electrical - Engineering -
Food/Beverage - Furniture - Hydraulic -
Lighting - Marine - Medical - Mining -
Telecommunications - Transport.

Machined Components

- **Wide Range of Components:** From standard product to custom made specials.

- **Wide Selection of Materials:** Aluminium - Brass - Steel - Stainless Steel - Engineering Plastics.
- **Flexibility:** From small to large volumes. Accommodating design changes, materials and finishes.
- **Affordable Controlled Costs.**
- **Product Development:** Prototype/Sample Services - all relevant information regarding customer specific components remain confidential.
- **Manufacturing Standards:** High precision and surface finishes. Quality control inspections carried out at key times with every production process to ensure customers' requirements are achieved.
- **Access to Service and Technical Support.**
