1- About Us - Capabilities

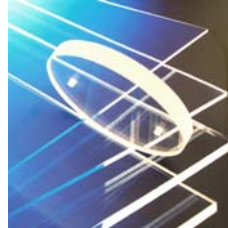

Glasslite is proudly an Australian manufacturer that specialises in two product groups: **Lighting Glass and Machined Components**. Our expanding customer base requires high quality products by nature of design, materials and manufacturing methods.

Lighting Glass

The lighting industry has a requirement for a wide range of glass types. It is most important that the correct glass components are used to achieve the luminaires best performance and overall design.

Our glass products are supported by the following processing services:

Cutting - Drilling - Edge Work - Machining - Forming/Slumping - Casting - Printing - Sawing - Sandblasting - Heat Strengthening - Toughening - Water Jet Cutting.

Machined Components

Glasslite's skilled team and inhouse high-tech CNC machining capacity provides components for a wide range of industries.

Target examples:

Agriculture - Air Conditioning - Automotive - Construction - Electrical - Engineering - Food/Beverage - Furniture - Hydraulic - Lighting - Marine - Medical - Mining - Telecommunications - Transport.

Services Provided: Turning - Milling - Sawing - Profile Cutting - Welding.

Wide Selection of Materials:

Aluminium - Brass - Steel - Stainless Steel - Engineering Plastics.

Ongoing Program: For new products, services and equipment upgrades. This is being achieved by working in close co-operation with our customers, specifiers and key material suppliers.

For outsourced services: Close working relationship is maintained with a network of reliable subcontractors.

The information contained in our catalogue and website is not intended to be an exhaustive statement of all relevant data applicable to lighting glass and machined components. It has been designed as a guide for customers to the products and services Glasslite can offer. No responsibility is implied or accepted for or in conjunction with quality or standard of any product or its suitability for any purpose or use. It is the responsibility of the user to ensure product specified is fit for the purpose intended.

Glasslite Pty Ltd reserves the right to modify or change designs and specifications detailed in this catalogue.
